**PRESS RELEASE**

FOR IMMEDIATE RELEASE

September 15<sup>th</sup>, 2021

Contact: Chief Medical Officer, Chair  
Health Services Subcommittee  
National Emergency Committee

*Kingstown, St. Vincent and the Grenadines*

**FIFTY-FOUR (54) NEW COVID-19 CASES**

Fifty-four (54) new COVID-19 positive cases were reported from four hundred and twenty-two (422) samples processed on Tuesday September 14<sup>th</sup>, 2021, resulting in a positivity rate of 12.8%.

Six (6) new recoveries were noted over the reporting period. Two hundred and sixty-nine (269) cases are currently active and thirteen (13) persons with COVID-19 have died. Two thousand six hundred and thirteen (2613) cases of COVID-19 and two thousand, three hundred and thirty-one (2331) recoveries have been recorded in St. Vincent and the Grenadines since March 2020.

In view of the confirmed presence of the Delta, Mu and Gamma variants in the community and the significant increase in the number of new infections, transmission and severe COVID-19 disease, strict enforcement and compliance with all protocols and recommendations by everyone is strongly recommended. The correct and consistent use of masks, avoidance of crowds, physical distancing, proper hand sanitizing and immunization with available vaccines have all been proven to significantly reduce the risk of being infected, getting sick and or dying from the COVID-19 virus.
