**PRESS RELEASE**

FOR IMMEDIATE RELEASE

October 15<sup>th</sup>, 2021

Contact: Chief Medical Officer,  
Chair, Health Services Subcommittee  
National Emergency Committee

*Kingstown, St. Vincent and the Grenadines*

**TWO HUNDRED AND ONE (201) NEW COVID-19 CASES  
FIVE (5) DEATHS**

One hundred and three (103) new COVID-19 positive cases were reported from seven hundred and seven (707) samples collected on Thursday October 7<sup>th</sup>, 2021, resulting in a positivity of 14.6%. Four (4) of the new cases were imported cases. Fourteen (14) rapid antigen positives cases were reported from flu clinics on October 7<sup>th</sup>, 2021.

An additional ninety-eight (98) new COVID-19 positive cases were reported from four hundred and eighty-one (481) samples collected on Friday October 8<sup>th</sup>, 2021, resulting in a positivity of 20.4%. One (1) of the new cases was detected during exit screening. Thirty-five (35) rapid antigen positive cases were reported from flu clinics on October 8<sup>th</sup>, 2021.

There are currently seven (7) patients admitted for COVID-19 at the Argyle Isolation Facility. All are unvaccinated. Nineteen (19) patients are admitted to the COVID-19 wards at the Milton Cato Memorial Hospital. Seventeen (17) patients are unvaccinated, and two (2) patients are partially vaccinated.

Five (5) additional COVID-19 deaths have been recorded. An 81-year-old female who tested positive for COVID-19 on September 26<sup>th</sup>, 2021, was admitted to the COVID ward at the Milton Cato Memorial Hospital and died on October 11<sup>th</sup>, 2021. A 72-year-old female who tested positive for COVID-19 on October 9<sup>th</sup>, 2021, was admitted to the COVID ward at the Milton Cato Memorial Hospital and died on October 10<sup>th</sup>, 2021. A 93-year-old female who tested positive for COVID-19 on October 11<sup>th</sup>, 2021, died at home on October 14<sup>th</sup>, 2021. A 64-year-old male who tested positive for COVID-19 on October 5<sup>th</sup>, 2021, was admitted to the COVID ward at the Milton

Cato Memorial Hospital and died on October 15<sup>th</sup>, 2021. A 57-year-old male who died on October 13<sup>th</sup>, 2021, tested positive for COVID-19 during postmortem testing. All the patients died of COVID-19 pneumonia, had underlying conditions, and were unvaccinated. Their deaths bring the death toll from COVID-19 to forty-seven (47). Two (2) other deaths in COVID-19 positive patients are currently under investigation.

Thirty-seven (37) new recoveries were noted over the reporting period. One thousand five hundred and thirty-one (1531) cases are currently active and forty-seven (47) persons with COVID-19 have died. Four thousand and four hundred and eighteen (4418) cases of COVID-19 and two thousand, eight hundred and forty (2840) recoveries have been recorded in St. Vincent and the Grenadines since March 2020.

In view of the confirmed presence of the Delta, Mu and Gamma variants in the community and the significant increase in the number of new infections, transmission, severe COVID-19 disease and deaths, strict enforcement and compliance with all protocols and recommendations by everyone is strongly recommended. The correct and consistent use of masks, avoidance of crowds, physical distancing, proper hand sanitizing and immunization with available vaccines have all been proven to significantly reduce the risk of being infected, getting sick and or dying from the COVID-19 virus.
