**PRESS RELEASE**

FOR IMMEDIATE RELEASE

September 19<sup>th</sup>, 2021

Contact: Chief Medical Officer, Chair  
Health Services Subcommittee  
National Emergency Committee

*Kingstown, St. Vincent and the Grenadines*

**THIRTY-NINE (39) NEW COVID-19 CASES**

Thirty-nine (39) new COVID-19 positive cases were reported from three hundred and eighty-nine (389) samples processed on Saturday September 18<sup>th</sup>, 2021, resulting in a positivity rate of 10.0%. All cases are contacts of positives or persons seeking care.

There are currently sixteen (16) patients admitted for COVID-19 at the AIF. All are unvaccinated.

Six (6) new recoveries were noted over the reporting period. Four hundred and seventy-five (475) cases are currently active and fourteen (14) persons with COVID-19 have died. Two thousand eight hundred and thirty (2830) cases of COVID-19 and two thousand, three hundred and forty-one (2341) recoveries have been recorded in St. Vincent and the Grenadines since March 2020.

In view of the confirmed presence of the Delta, Mu and Gamma variants in the community and the significant increase in the number of new infections, transmission, severe COVID-19 disease and deaths, strict enforcement and compliance with all protocols and recommendations by everyone is strongly recommended. The correct and consistent use of masks, avoidance of crowds, physical distancing, proper hand sanitizing and immunization with available vaccines have all been proven to significantly reduce the risk of being infected, getting sick and or dying from the COVID-19 virus.
