Yachts arriving with negative PCR tests will complete a ‘Risk Assessment Form’ which must be submitted **at least 24 hours prior to arrival** in St Vincent and the Grenadines.

2. Once accepted for entry, yachts will proceed to designated area(s) for on-vessel quarantine.

3. Persons arriving with negative PCR test result will only be required to quarantine until their test results have been approved and clearance completed.

4. Those who opt for SVG COVID-19 PCR testing will be required to quarantine until results are received as negative. Results will be available at 72 hours after sample was taken. If positive, individuals will be isolated either at an approved hotel or at government facility for care and treatment if necessary. Both testing and isolation will be at the cost of the individual.

5. While in quarantine no other crewmember or passenger from a commercial flight would be allowed onboard the vessel. Approval/Clearance is granted from the Ministry of Health, Wellness and the Environment. Failing to comply would result in a reset of quarantine for the crew and passengers on the vessel.
